

A Special Program Run By Hind's Feet Farm

Help People with Brain Injuries Re-Learn to Effectively Communicate!

The Hinds' Feet Farm Day Program is a paradigm shift from the traditional medical, treatment, model for people living with brain injury, to a model that embraces a holistic health and wellness orientation, empowering members toward occupation and meaning in life post injury. As part of our mission to support our members in need we recognize their individual needs to develop communication skills. Created by, and for, persons living with brain injury; members actively participate throughout the entire infrastructure of the program. Hinds' Feet Farm is person-centered, member empowered, self-determined, free choice, conceptualized and driven program. Members are self governing through the fluidity of the program by self-designing opportunities to engage in reestablishing and empowering occupation.

PROJECT SPEAK OUT! has developed as a result our increased push to re-develop the communication skills of those living with brain injuries. A number of directly related activities and helpful groups have been identified to help us with this task. Funding is needed to enable these activities and groups to happen. Funds collected for **PROJECT SPEAK OUT!** will be utilized to:

- Pay for membership with a local Toastmasters International club so that program participants can hone their speaking and communication skills in a supportive and educational environment on a weekly basis. Membership fees to allow a participant this terrific opportunity is only \$125.00 a year.
- Cover the costs associated with transportation to speaking engagements where participants educate others about living with a Brain Injury. By relating personal experiences our program participants help grow the awareness in the community around them.
- Cover onsite costs to include special communication presentations as part of our programing.

Our goal is to make our program participants lives as meaningful and productive as possible, one of the first skills to re-teach and improve after a brain injury is communication. The support of our local community to make this a reality is appreciated and recognized. All sponsors will be recognized for their involvement and support of this wonderful program.
